## roller blinds

Great for heat and light protection, smooth operating roller blinds are available in a selection of blackout, translucent and sunscreen fabrics which can complement panel glides and roman blinds to give a unified look.

All of our roller blinds are beautifully handcrafted, resulting in a far superior product which we believe to be the finest on the market.

### Features

There is a stunning versatility to our fabric collection which will add glamour to any interior. We have a vast range of colours and textiles to choose from, including translucent, blackout, sunscreen and jacquard weaves. Your fabric choice can also help protect your environment by taking into account, privacy, light, heat and glare.

State of the art fabric cutting technology used is essential to aid the elimination of fabric fray and to remove the need for side hems, creating a cleaner superior finish.

Made to measure pelmets include: Deluxe, Plantation, Linea, Cassette or Classic style pelmets. Bottom rails include: round, oval and flat bottom rails, with fancy trims also available.

The channel blind system is designed to prevent daylight from passing in around the edges and are popular in media rooms or where total blackout is required. The linked system allows multiple blinds to be linked together reducing the gaps between blinds to dramatically improve both privacy and light - perfect for bi-fold and sliding doors and large glazed areas. The dual system allows for the neat fit of two blinds (eg: translucent and blackout) to operate on one window.

Control light and privacy with one touch of the remote. Roller blinds can be used with remote control and automatic systems. We use Somfy Automation which also comes with their 5 year guarantee.

We use only aluminium tube, which will not rust.
